

A low-angle, upward-looking photograph of several modern skyscrapers with glass facades, reaching towards a clear blue sky. The perspective creates a sense of height and architectural grandeur. The buildings are framed by a white curved shape that separates the image from the company name.

ABOUT US

Dismar Group, which has been operating in the aluminum curtain wall sector since its establishment in 2007, has successfully applied dozens of different materials on the exterior in hundreds of projects.

Glass facades, aluminum joinery, aluminum composite plate coatings, ceramic & sinterflex, compact laminate coatings, eaves, balustrades, automatic door applications etc. Having experience in many products, Dismar Group can work with project-specific applications and develop application solutions. Starting from the contract, Dismar Group, which manages project planning, finance, purchasing, production, shipment, assembly, accounting and all administrative processes on a digital platform through technological systems, closely follows the technological developments in the sector in order to increase the quality of production.

It provides project and engineering services with its technical staff consisting of experienced architects and engineers. Dismar Group works with many domestic and foreign brand product alternatives that direct the sector.

HAKKIMIZDA

Kurulduğu 2007 yılından beri alüminyum giydirme cephe sektöründe faaliyet gösteren Dismar Grup, yüzlerce projede onlarca farklı materyali dış cephede başarıyla uygulamıştır.

Cam cepheler, alüminyum doğramalar, alüminyum kompozit levha kaplamaları, seramik & sinterfleks, kompakt laminat kaplamaları, saçak, korkuluk, otomatik kapı uygulamaları vb. birçok ürüne ait uygulama tecrübesi olan Dismar Grup, projelere özel uygulamalar ile çalışabilmekte ve uygulama çözümleri geliştirebilmektedir. Sözleşmeden başlayarak projelendirme, finans, satınalma, üretim, sevkiyat, montaj, muhasebe ve tüm yönetsel süreçleri dijital platformda, teknolojik sistemler üzerinden yöneten Dismar Grup, üretim kalitesini artırmak adına sektördeki teknolojik gelişmeleri yakından takip etmektedir.

Proje ve mühendislik hizmetlerini deneyimli mimar ve mühendislerden oluşan teknik kadrosuyla gerçekleştirmektedir. Dismar Grup, sektöre yön veren yerli ve yabancı birçok marka ürün alternatifi ile çalışmaktadır.

---BULLET PROOF GLASS / KURŞUN GEÇİRMEZ CAM

Why Bulletproof Glass ?

With our internationally accredited ballistic laboratory, TÜV Rheinland origin certificates, we provide international EN1063 (BR2-BR7) NS and UL 752 NS standards to companies that demand bulletproof glass, armored car rental companies in the defense industry and civil sector, in line with projects. It continues its production in Stanag and NIJ standards, which are equivalent to these standards, on a project basis. Penka Lead, which continues its development by integrating new technologies in the sector into its own production, with its usable technology.

-With Polycarbonate and Without Polycarbonate

-Flat or Curved,

-Heated (with Hidden Resistance)

-Serigraphy-Without Serigraphy

It produces glass with its color options, and thanks to polycarbonate in lead proof glasses produced, it provides approximately 50% lightness and the feature of not throwing glass splashes.

Neden Kurşun Geçirmez Cam?

Uluslararası akredite balistik laboratuvar olan TÜV Rheinland menşei sertifikalarımızla, Uluslararası EN1063 (BR2-BR7) NS ve UL 752 NS standartlarında, kurşun geçirmez cam ürünleri talep eden, savunma sanayisine ve sivil sektöre zırhlı araç üreten firmalara, projeleri doğrultusunda hizmet vermekteyiz. Bu standartların muadili olan Stanag ve NIJ standartlarında da üretimleri proje bazında sürdürmektedir. Sektörde yeni uygulanan teknolojileri kendi üretim kabiliyetlerine entegre ederek gelişimini sürdüren Penka Kurşun Geçirmez teknolojisi ile;

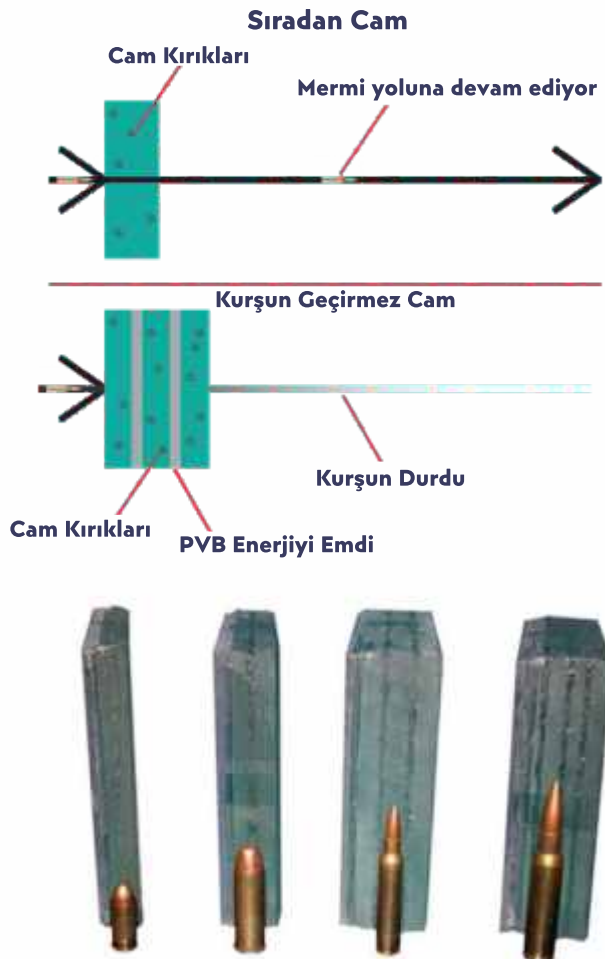

-Polikarbonatlı ve Polikarbonatsız

-Düz veya Bombeli,

-Isıtmalı (Gizli Rezistanslı)

-Serigrafili - Serigrafisiz

Renk Seçenekleri ile cam üretimi yapmakta, ve üretilen kurşun geçirmez camlarda polikarbonat sayesinde yaklaşık %50 hafiflik ve cam sıçrağı atmama özelliği sağlamaktadır.
